3. Private self-flowing source hot spring

The temperature of self-flowing hot spring in Hakone Miyanoshita is about 50 degrees, and its source of "simple alkaline", good heat retention after taking a bath, is known as "beautiful-skin water" that makes your skin soft and smooth.

You can enjoy taking a bath in a guest room (sweet rooms only), public baths, or free private open-air baths.

All the baths in our hotel are flowing straight from the hot spring source.
